EMSC02 Resolution

Western Plains Region – Fall Meeting

Resolution 2018-##

Support for Pediatric Emergency Care Coordinators in Emergency Medical Service Agencies

Whereas providing high-quality emergency medical services (EMS) to children requires an infrastructure designed to support the care of pediatric patients;

Whereas EMS providers face challenges related to the maintenance of pediatric skills due to infrequent encounters with children, particularly the critically ill and injured;

Whereas the 2007 Institute of Medicine (IOM) report, "Emergency Care for Children: Growing Pains," recommends that EMS agencies appoint a pediatric emergency care coordinator (PECC) to advocate for improved EMS provider competencies and the availability of appropriate resources for pediatric patients to ensure that the agency and its providers are adequately prepared to care for ill and injured children;

Whereas the Health Resources and Services Administration, Maternal and Child Health Bureau's Emergency Medical Services for Children (EMSC) program has established a
